

This guide will cover the specifics of ordering the **Gallery-wrapped canvas prints** and the benefits of this product. This guide also has a complimentary Video Tutorial available online to further assist your ordering needs.

The price of the Gallery Wrapped prints include the printing and assembly and our museum-quality frames are 1 ½" thick and require no further preparation for hanging.

You will need to be in the Photographic Products catalog of the Black River Imaging software and then choose the Gallery Wrap tab to place an order. Gallery Wraps are only available in selected sizes, click the size you need and because of the special cropping of this product the Image Layout area appears differently than it does with other print products. The area shaded in gray on each side indicates the portion of the canvas that is wrapped around the edge of the frame, while the black areas indicate the folded corners and will not be seen on the final product.

The white area is the front of the gallery wrap and is sized the size of the ordered print. This requires your image to be sized larger than the actual print size. For example when ordering an 8x10 Gallery Wrap you will add 1 ½ inch on each side for the edges making the size of the image 11X13.

You will also have Image Options available on this product. These will be displayed in the Options palette when you have an image in the product opening. You will need to select these options before clicking Add to Order.

This product has a two-day turn-around and you may combine it with other prints and products but bear in mind they will not ship until all items in the order are completed.

We also offer canvas stretcher frame and dry mounting options that you can learn about in the Finishing Options guide and tutorial. That product is printed on photographic paper rather than canvas.
