

This Guide Applies to the Black River Imaging Software

Photographic Greeting Cards

Black River Imaging software offers many choices of photographic greeting cards including Thank you cards, Christmas Cards and some with blank greetings so they can be customized to your needs. This guide will cover the ordering process for the Greeting cards. This guide also has a complimentary Video Tutorial available online to further assist your ordering needs.

To begin you will need to be in the Photographic Products catalog of the Black River Imaging software and then choose the Greeting Cards tab from the Sizes Palette. The greeting cards are divided by subject, size and layout orientation.

You may view the Greeting Cards online at www.color-labs.us/candid/hcc.html. Most of the cards are offered with one image but there are several that have two openings. The image size varies from design to design so when you see 8x4 or 5x7 it is referring to the size of the print itself, not the image opening. Drop your images into the openings and adjust them to the crop you want. You are now ready to add the text. Most cards will have a preset greeting as well as an area to type in personalized text. Some of them have only personalized text.

When typing your text, be sure to verify the spelling of the names, and enter the line breaks where you want them. Not every design is suitable for multiple lines of text. Once you have the text entered you will want to choose the font color, type and style. Not every font is going to be suitable for every design due to the size of text boxes. Make your selections from the Options palette and when you are satisfied, enter your quantity and Add to Order.

**** Helpful Hint **** You may want to type your names and/or greeting in a document with Spell Check enabled. You can then copy and paste (to paste you will need to use Control and V) into the text opening in the software. This will allow you the chance to see your text larger; bear in mind you will need to enter your line breaks in the software once you have dropped in the text.

All greeting cards come with envelopes including the Drop in your Own Design and the Template Designer options.
