

Album Information Guide

Below is a listing of album products and their specifications that can be ordered through the Album Manager System. You may upload your pages to the Album Manager using either the Layout Creator (when using our composite templates) or directly through Album Manager (if using pre-designed pages) to load the layouts to the Album Manager site.

Once you are satisfied with all of the pages you will check out online and/or choose to post the event for viewing and/or approval at the Approve My Album site. You will find guides for each of these systems on the Learning Center and on the Album Manager online pages.
