

This Guide Applies to the Black River Imaging software

Preview Catalog / Proof Prints

This catalog provides you with an economical and quick way to order your proof orders. You will find this product in the Preview Catalog of the Black River Imaging software.

Once the product catalog loads you will need to click on Sizes or use the Sizes Palette where you will find the proof prints. Proof prints are offered in standard proof sizes of 3.5x5, 4x5, 4x6 and 5x5. These prints are offered in E Surface only and have no retouching options available. A \$10.00 minimum order is required in this catalog file. If your prints total less than \$10.00 a fee will be added to satisfy the minimum charge.

Click the size print you want and drop your image in and click Add to Order when you are satisfied with the way the image appears within the product bounds as indicated by the blue lines. You may adjust the crop of the print by using the zoom slider and/or moving your image with the cursor. There is also a crop or fit option which will auto fit your image in the product opening. Please bear in mind that if you see white lines in the product bounds that is how the print will appear as well.

You may want to opt to utilize the Select All option if you are ordering from a larger number of images. You will want to be sure the Auto Rotate option is selected when using this feature. You will find this button in the Pro Tool layout beneath the Rotate Image and Rotate Layout options.

If you have an account with www.seemyprints.com and are also posting your images at the online hosting site you may choose the Post at See My Prints option from the Review Order Screen to have the images you have ordered posted for you. You will be emailed when they are ready. Please refer to the See My Prints guides for further details.

This guide also has a complimentary Video Tutorial available online to further assist your ordering needs.
